Mr. Fernando Hernandez
Facility Manager
IBERIA AIRLINES
Zona Industrial no 2
Aeropuerto Barajas
28042 Madrid, Spain

Dear Mr. Hernandez:

The Office of Approvals has reviewed your application for registration as a cylinder re-qualification facility at the recommendation of G & C Kinney, Inc. and issues registration number **D974** to your facility at Zona Industrial no 2, Aeropuerto Barajas, Madrid, Spain. This number applies to this location only and is valid for a period of five years from this date based upon maintenance of equipment and personnel capability.

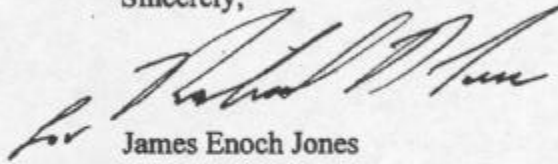

I have enclosed a free copy of the videotape, "Ensuring Safety: The Cylinder Re-tester's Guide" to show a typical OHME inspection, the type of records you must keep and references to incorporated materials. RSPA believes that this video will provide valuable information to help assure your compliance with requirements of the regulations.

In addition to the re-qualification of cylinders under the provisions of Section 173.34 of Title 49, Code of Federal Regulations, 49 CFR, the following conditions must be met:

1. You must notify this office of any change in address, management, equipment or testing personnel within twenty days of the change.
2. Testing must be performed by, or in the presence of, a designated hydrostatic test operator who has been observed by the Independent Inspection Agency or who has been added to your file by addition under condition number one (1) above.
3. A copy of this registration must be maintained adjacent to the testing apparatus.

4. A copy of your application, all supporting documentation and a copy of this approval must be retained and made available to DOT upon request.

Sincerely,

James Enoch Jones
Chief, Approvals
Office of Hazardous Materials
Exemptions & Approvals
